THECHNICAL DATA SHEET

SULPHUR BENTONITE 90% (Pastille)

BEHIN TRADING

Product Description:

Pastille Sulphur Bentonite 90% is one of the best fertilizers for improving soil pH. This fertilizer contains at least 90% pure elemental sulphur along with bentonite and other accompanying materials. Sulphur Bentonite 90% is a molten elemental sulphur bound in bentonite clay. The unique combination of sulphur on the surface of high quality dispersible bentonite provide more rapidly available S than elemental granulated products but less leachable than sulphate sulphur.

Producer: Private

Applications: - Fertilizer

Table of Description:

Property	Specifications	Test method
Sulphur content (wt%)	85 min	ASTM D 4239
Bentonite content (wt%)	15 max	ASTM D 4239
Mass of moisture (wt%)	0.5 max	ASTM D 4643
Disintegration rate in water	- Pass #No. 40: 50% - Pass #No. 20: 70%	Keg River Test
Particle size (wt%)	- Min 75% between 2and 5 mm - Less than 0.3 mm<1%	ASTM C 136

Packing: Bulk / Jumbo Bag / 25kg Bags

Storage Conditions:

- Stored in a cool, dry, and well-ventilated area to prevent the buildup of potentially flammable or toxic sulfur dioxide gas.

- Store in a tightly-closed container away from sources of heat or ignition.
